

**Kurita’s solution to control & monitor Legionella.**  
**LOCK: Legionella Overall Control by Kurita.**

Legionella disease was discovered in the late 70’s after several outbreaks. In the last ten years the authorities and countries started to intensify their efforts to regulate the topic. Countries like Spain, France, Nederland, Germany and UK have strict laws that force the final users of the water in industrial and municipal installation to have a close control of their systems and applications. Even in the countries where direct laws about Legionella don’t exist, there are guidelines, norms or best practices that must be fulfilled. Kurita has been always one step forward in the Legionella control and with a long trajectory in the field.

**Kurita’s LOCK concept offers a full package for the control, monitoring and treatment of Legionella:**

- Certified specialists
- Fast detection methods
- Action plan
- Monitoring
- Technologies & products
- Risk assessments
- Procedure
- Sampling & analysis
- Cleaning & disinfection
- Training

**KuriLoc Kit – Legionella new test method.** One of the latest innovations in the Legionella control is the rapid detection method: **KuriLoc Kit**. It offers the first results only 3 hours after the sampling and is highly specific. Customers benefit from the advantages of the fast detection kit **KuriLoc**, either by purchasing their own device or by using the services of Kurita’s accredited laboratories.

Kurita’s qualified experts will be glad to advice personally and individually.

**About Kurita Europe**

Kurita Europe is a subsidiary of Kurita Water Industries Ltd., headquartered in Tokyo (Japan). Kurita is one of the international market leaders in industrial water and process treatment. Our products and services for cooling water systems, boilers, membrane filtration units and drinking water inhibit scaling and corrosion, thus increasing the efficiency of systems, optimising processes, and saving water and energy. Over 3,500 patents are proof of Kurita’s innovative approach to a resource-saving consumption of water. Moreover, Kurita is one of only 30 worldwide enterprises listed in the Nature-Stock-Index (NAI).

More information about NAI: <http://www.nai-index.de>

**Setting new standards in chemical treatment.**

Kurita sees continuous research as one of the most important tasks and is driven by the realisation that water, our most important resource, is in limited supply. All energy and competence is therefore invested in the effective usage of this precious commodity. Innovative technologies like the LOCK concept provide decisive impulses – with solutions for Kurita’s customers and the environment.

Kurita’s portfolio contains products awarded with the National Sanitation Foundation (NSF) quality seal of approval and which are suitable for the conditioning of RO-plants in the production of drinking water.
