# Safety for our Guests

Welcome to KETC!

Topics such as safety, health and environmental protection are the most important aspects of our cooperation at the research center. We therefore ask you to comply with our safety rules.

## Rules in the laboratories and on the company premises

- Please register at the reception. There, you will be picked up by the person who invited you.
- Observe the safety markings on the entire site and in the building (mandatory, prohibition and warning signs).
- Always keep traffic and rescue routes clear, and in addition all emergency exits and extinguishing equipment. Fire doors must always be kept closed.
- Smoking and naked flames are prohibited. Please ask for designated smoking areas.
- Photography is only allowed by prior arrangement.
- No access to laboratory areas and pilot plant area without the express permission of the person responsible and only when accompanied by Kurita staff.
- No access to the laboratories
  - for people with pacemakers
  - for pregnant women
- Please note our current pandemic and hygiene instructions.

## Behavior in case of fire

Keep calm and avoid panic

In an emergency call 112

Leave the building in case of alarm

Do not use the elevator during evacuation.

Take the shortest route outside to the assembly point.  
Follow the instructions of our fire protection assistants.  
Do not leave the assembly point until the responsible person on site gives the all-clear.

## Observe the Safety Labelling

First Aid material

Fire alarm

Defibrillator

Fire extinguisher

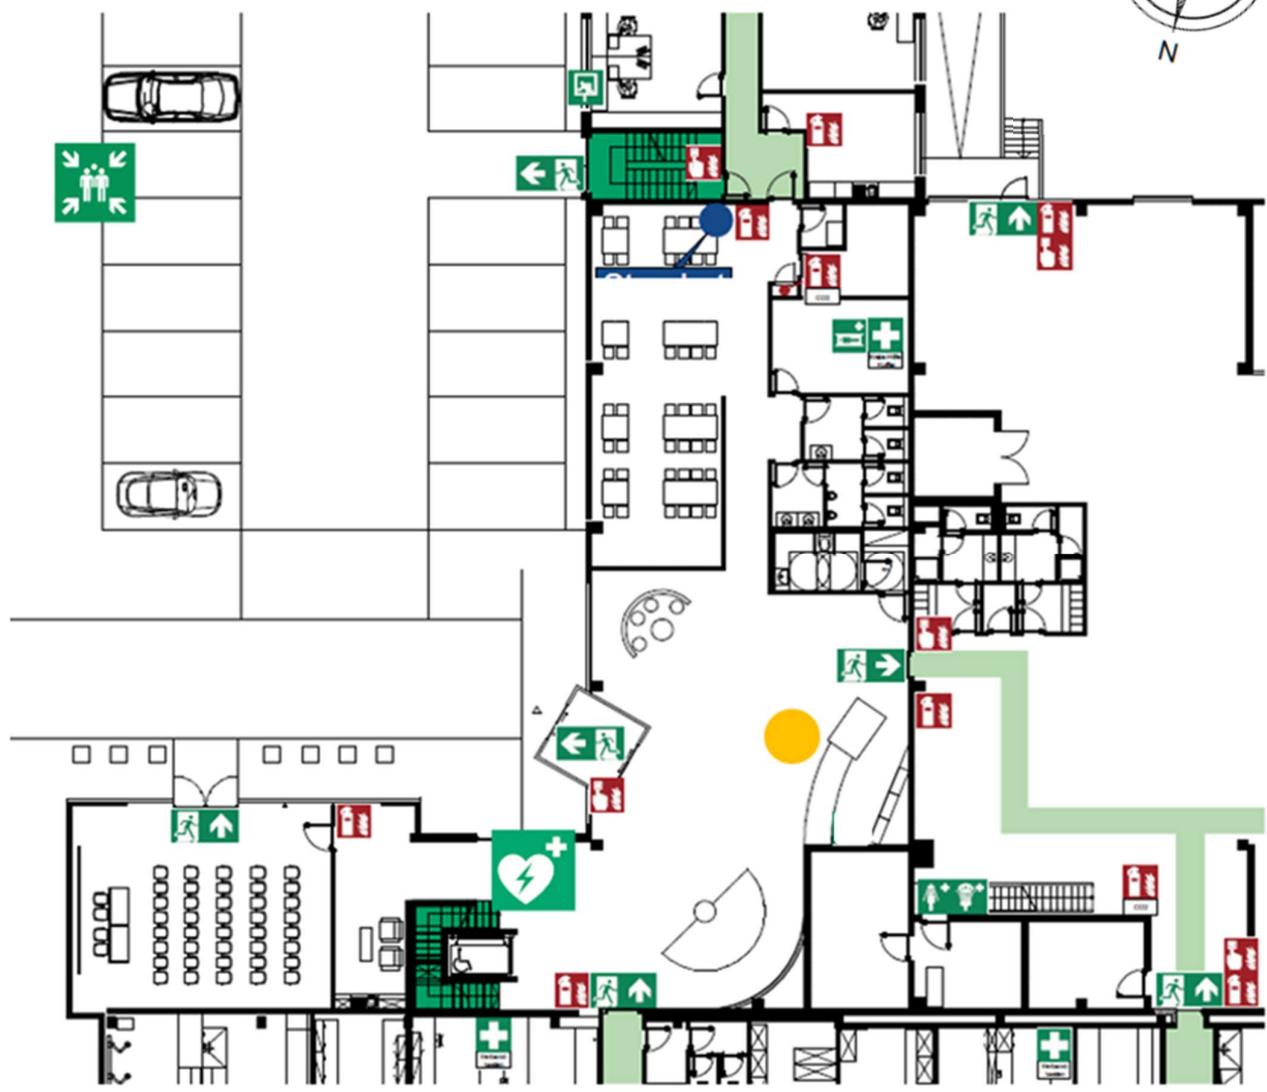

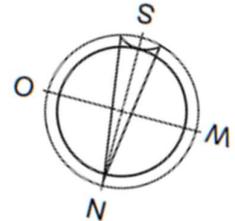

Escape and rescue plans, escape routes, emergency exits
